I have myself investigated spiritualism for thirty lears, am well acquainted with nearly all of their celebrated mediums from the Fox crits down to the present day, and I have yet to find that medium that has ever accomplished any good for themsolves or any one else, Every one of these celebrated mediums has been caught in their trickery, as Foster, 'Inde Davemports, Tox grifs, Eddy brothers and nany more hat I could mention if necessary. And why is it these in a tree triping to default such montebanks as this Pearson who of matted such a dastardly frame at Chelalis a shirt time ago under the guise of an evil spirit. And if there is any justice he should be punished to the full extent of the law 'Indian spirit,' 'evil spirit or no evil spirit,' 'ent spirit or mo evil spirit,' 'in it indiant mediums are the same old story, and amount to nothing whater. Now, if these mediums are spirit, 'evil spirit or no evil spirit or no ladian spirit, 'evil spirit or no evil spirit or finithat every artic e written in defense of these mediums are the same old stry, and amount to nothing whatever. I should like very much to be convinced of the truth of spiritualism, so much so that I will give 30 any medium \$1000 who will amswer me three questions correctly or I will give \$500 to any medium with our parts with the good to any medium \$100 who will amswer me three questions correctly or I will give \$500 to

The prefense that the road can t be completed unless the levee can be had, is merely a hypocritical method of applying

The warden of the Kansas pententury, in ar swer to nurrietous letters asking how the pro-hibition law works, shows that in the fifteen months from March, 1883, to July, 1884, in which the law was enforced as rigidly as at new time, the number of prisoners recrease from old of all the state was prosperous, a uployment was plenty, and yer this is the most rapid merense e et havon. Again, sections where the law was openly disregarded furnished a smaller preportion of convicts than those where it was more or less rigidly enforced. Thus four counties with a population of 11,533, in which the open sale of higher has never been interrupted sent but punety-five convicts, while six others with a population of 115,800, where the most work has been done enforcing the law, This of course does not prove concitisively that problem increases crame the other hand it does not prove that it issues crime. If does however tond to show that it is not good policy to enact a law which it is known a large portion of the community will persist-ently disregard

because (rearge W Cable has written an article in a w dely circulated magazine, which sets forth the adjustics of southern treatment of the colored population and appeals to the south to abandon if the Atlanta Constitition, a newsby 'a con remed negro manua." There is nothing so offensive at the south as those productions in literature which show the existence of race hatred there, together with its in colice, meanness and power. The south, it its heart and soul, as no more telerant of "Uncle Tom's Cal m' than it was in slavery times. It will ostraces his own choicest and most gifted writer it he runs contrary to its pre udicas against color and to its political perversity had

Mr Hirsch's ball to regulate compensation of school clecks is just, and ought to pass. It pro-vides that a school clerk shall have for his services, for he first \$20,000 of taxes collected 5 per cent , for the next \$20,000 2 per cent, and for all sums above \$40,000 1 per cent. This would fedure the compensation for districts where large sums are raised for school purposes to sensitiving like a proper figure. Undor the Irw as it now a may, the school clock of the Portland ustract gets a per cent, on all moneys, which gives him compensation ranging from \$5.00 to \$5.00 a year I is altogether too much and the stress of bard times makes it important to reduce it.

It is cleasan, to know that I language of Flanagan Mills is consistent with himself He thinks it "her ectly legiting that every republican office holder should be dis-He expects to loss his Texas collect orship—there are already 200 applicants for it— and is resigned. And he takes the broad and states man like view that the trouble with the republicar office holders is this They have fos-subject so long in office that they imagine that they are entitled to their mention by a medical of divine right. It is dangerous for such a system to be man gurated in a reput livin country."

What Two Portland Citizens Have to Say About the Exposition

The Tewn and its Equippes Interests-The People I'ar Behind the Age-The Paucity of Oregor's Exhit|ts-Etc

The following extracts from a letter written by Frank Zan, one of Port and's wholesale merchant whol is now in New Orleans, to his brother, will prove readable to all who take an

interes in the great world a fair New Orleans, Jan 2.

I reached here last Tuesday, Decomber 20, the change in the clima a causing me to perspire freely ind necessitating lighter raiment. I remained at the St. Charles I otal the first day and then moved with my friend, L. Redan, propriator of the Driard house, Victoria, to a room in the same building, where we are very comfortably fixed. We cat where we please, and I delly 1 they know how to joinge here. They know how is the time for their harvest and charg secordingly Redam is a thome, having lived here some fourteen years ago, and consequently I have a better chance with him than if alone. interest in the great world a fair

ited here some routteen years ago, and consequently I have a better chance with hum than it alone.

It is the city of New Orleans to some respects, very much, but I cannot ledy fielding many faults. Its appearance is very bright and inviting buildings are stry sociable, on the other is mit, the streets are very narrow, with the exception of Gans street, which is simply grand in every respect its extreme width, one buildings and stores show it off to great advantage, and what is best if all for the teople, one can buy goods of all descriptions cheaper here than in Portland, and rancheso, Chicago, St. Pari, st. Jonis, or an other place that I have ever been in the Intel States. The old French town is dury and it, had condition. The city is laid out so flat that I would not care to like here in summer. The city cannot have proper drainage and sewerage, and the collection of refuse matter in the gratter cannot but cause or identic fevers. "Here are three wholesale wooden and will low-bace houses here. They import haskets and dampions direct from Germany. Thoy self some things very low, but these houses also keep a line of crockery, outlery, shelf hardware and notons, which helps them out. I have sent the great of too levee, with its herde of nogroes, the jo eem arkets and the grand steamers of the great Mestastipil. The steamers are very names. notook, which helps them out. I have seen the great of then levee, with its horde of nogroes, the je we markets and the grand steamers of the great Missisppi. The steamers are very numes one, it is not allowed to the foreit of railroad era. There are some beautiful gover ment buildings here, runripal among which is the custom house, which is very grand. The people here are at least a ceatury tabind those of the north for energy and industry they have many churches, but many nore gambling dens and hurdy-gurdy shows. So long as sight as a property of the north for energy and industry they have many churches, but many nore gambling dens and hurdy-gurdy shows. So long as sight degrated places are sillowed to be multicly conducted the people will never rise to the standard of those of the northern states. The principal manualities here are Irish, french and negroes, with the frish far it the lend. Of course you will find all instens of the gloss represented here. The productions are very few—sagur, oranges and cotton are all I can learn. All there where supplies are in norted. One thirty I have "ailed to see 'n this section is the happy and a cerful farmers' homes that one sees on every side it (regon Here they all seem smith, disma rookenes and the people with eres because they cannot being the enselves. It might be fan different if they would put their shoul ders to the west; but I wa affaid it is not mither I.

The general povernment has done much for them, and the gave mixed to undertake to describe the technique on a deter, so I will defer that dain my return home. The Origon exhibit is very good in variety and well managed by it. Alien, who sanglicasts be found it his post ready and willing to answer the numerous questions of the many visitors. Comparing our exhibit with hat from other states and large states like here you'ld, lithink, sic, but small 0.183, and even territories) we find we are amongst the small in exh biture, and why is it? Not because we have not the things to send, bu, because we are citeless and thoughthats. We could, and many actured goods.

I nave see artace a from other states with which I am very familiar, and without exagg ration I can say that if mine I would be asbamed to enter them on exhibition.

Mr. Allen wants me on any return to estect some goods of our manufacture and send them to him no one shipment, and but it similar loss, as sor e are doing, and thus competing to pay exorbition freights. He told the had has received three small bodes of golds from Oregon 1 vex news which cost \$70 freight.

AN EXTRAOBDINARY DAY 8 WORK.

Three hundred and htty packages wrapped up on Saturday, January 17. The one-price bool and shoe hous, stunted at 14 First street, between Main and Madison, started in last Friday with the most wonderful sale on reaced, trking in consideration had boots and shoes are sold only. I will say to all those who called on last saturday, and could not be waited upon I am happy to state this. I have procured didutional help and un read't to meet jou all at the present into I is it is general expression. "Mono; is scarce," and "The sare hard." but let any mer chant offer indocuments such as this shoe hruse bas offered since this grand sale has tlatted and low will find the buying public ready with their parties in band. A combine occurrence let-altriday, ladd's would come in with the intention of the jung one pair of shoes for a child and finding after prices so extremely low would buy two and three pairs for the same chill. In fact this house is soling new shoes as cheap, and sometimes cheaper, than it would cost to mend that thus is no clearance sale no assignee sale no suction sal. This wonderfut sale is merely gotten up to bring this, extraordinary lire boot and shoe ones of the prices come entry in the d'ut to avoid the throng in the afternoon.
